	<p>housing. This is what justifies this project of construction of 2,500 socioeconomic housing units which comes as a support to the efforts that the cameroonian government is already putting in place.</p> <p>In addition, this project will ensure at least 3,000 direct and will be extended to other cities of cameroon and the central africa sub-region why not.</p>			
33	<p>Project of Production of Local Construction Materials And Quarry Products (Gravel, Sand, Pouzzolana), Principal Inputs Of The Construction.</p> <p>The economic development of cameroon during the structuring projects that will lead cameroon be an emerging country by 2035 will lead to huge movement of construction companies, to the creation of cement plants (using pouzzolana as the main raw material for manufacture of cement) and the consumption of large quantities of construction inputs (like pouzzolana, gravel, sand, compressed earth blocks, etc). Unfortunately the actual offer is not enough to cope with the need for these inputs.</p> <p>That is what justifies this projects which will lead to the exploitation of quarries and quarry products for commercial, construction and industrial purposes, bearing on mind that the mostly used construction inputs after cement are gravel, sand, pouzzolana for foundation, pouzzolana is also used as main raw material for manufacture of cement. On the other hands, to promote low-cost and bio-constructions, earth blocks will be produced in huge amount to up the task.</p> <p>In addition, this project will ensure at least 4,000 direct and will be extended to other cities of cameroon and the central africa sub-region why not.</p>	Infrastructure	30	<p>Patrice Bienenu Ngue Legal Affairs Manager Encogecam Co Ltd Po Box 24141 Douala Cameroon M: +237 95 13 32 60 E: encogecam@yahoo.fr</p> <p>NGUIMFACK Paulin Ingénieur de génie Civil Directeur Général ENCOGECAM Sarl Batiment et Travaux Publics BP. 24141 Douala Cameroon T: (+237) 33 47 17 85/33 00 34 32 E: encogecam@Yahoo.fr</p>

34	<p>Project Of Construction Of A Leisure And Relaxation Multicomplex At Tiko-Cameroon</p> <p>The massive rural exodus and demographic growth have led to a vertiginous saturation in urban centers. This has led to a decrease in recreational areas in urban centers, the saturation of the atmosphere, increasing of the greenhouse effect. So, outside office hours, people can no longer retreat into appropriate areas for relaxation and distraction.</p> <p>It then becomes crucial to create new centers for recreation, relaxation, and distraction outside urban centers to enable people to live good moments in family or between friends outside of work hours. This is what justifies this project.</p> <p>At the end, this project will contribute in creating at least 2,000 direct and indirect jobs, in the amelioration of urbanism, in the amelioration of the living conditions of populations and in the development of tourism. This type of project will be reproduced nationwide.</p>	Infrastructure	30	<p>Patrice Bienenu Ngue Legal Affairs Manager Encogecam Co Ltd Po Box 24141 Douala Cameroon M: +237 95 13 32 60 E: encogecam@yahoo.fr</p> <p>NGUIMFACK Paulin Ingénieur de génie Civil Directeur Général ENCOGECAM Sarl Batiment et Travaux Publics BP. 24141 Douala Cameroon T: (+237) 33 47 17 85/33 00 34 32 E: encogecam@Yahoo.fr</p>

	<p>Our products, i.e. portable solar led lanterns, have been designed & developed based on stringent quality standards. Lighting rural Africa aims to accelerate the development of modern off-grid lighting in west and central African sub-region, where an estimated 15 to 25 percent of household income is spent on hazardous and low quality fuel-based lighting products. The goal is to mobilize and provide support to rural communities by supplying quality, affordable, safe and clean lighting to rural folks.</p> <p>With energy costs on the rise, many consumers are considering alternative energy options. One easy way to use alternative energy in the home is to replace a few traditional outdoor lights with solar lights. These lights have many advantages, and are widely commercially available. They are easy to install, and require a minimal investment.</p> <p>Portable lanterns can be charged outside during the day and used for internal lighting at night.</p> <p>Indeed, the importance of (and demand for) artificial light is such that technologies for its more-efficient production evolved spectacularly during the 18th, 19th and 20th centuries.</p>			<p>M: +23777789487 T: +237 95417241 F: +237 33362424 E: musandamba@yahoo.com W: www.sunlite-solar.com</p>
37	<p>Collaboration with many consultancies in communication has enabled us to see opportunities which this field offers to cameroon; but which remains under exploited and lacks professionalism. Today, Mr. Corentin kenfack founder of "clamer press" wishes to extend this activity in order to be more competitive, to ensure the process of communication guide from a to z by our services, by recruiting young talented people, to accompany the individuals and small and medium sized enterprises (sme) and to rise among the best in the field of the numerical communication. This would make it possible to create the following solutions:</p>	Miscellaneous	.12	<p>Kenfack Dchetsong Corentin Chief Executive Officer M: +237 78013535 Clamer Presse Matala Guiassoa Epse Kamgang Eunice Accountant M: +237 76351939 Clamer Presse Clamer Presse P.O. 43	<p>This current project is conceived to provide quality seeds to users which are in line with the priorities of the government of Cameroon within the framework of the fight against poverty. This entails the multiplication of basic seeds of cassava and yam to meet the rising demand from national seed programmes, private seed multipliers and growers with the ultimate goal to boost the national food production.</p> <p>The current project with an estimated budget of two billion three hundred and thirty million one hundred and sixty three thousand eight hundred francs (2 330 163 800 F CFA = 4660327.6\$) has five main components. At the end of the project, it is expected that the objectives envisaged for agricultural production in the growth and employment strategy document (DSCE) will be attained. These include an increase in the production of roots and tubers crops from 3 836 000 T in 2005 to 6 319 000 T in 2015, an increase in the availability of quality seeds that will facilitate the industrialization of agriculture and the creation of employment particularly for the youths.</p>	Agriculture	4.6	<p>Lucien Isidore Essomba Coordinator Of The Roots And Tubers Development Program Chamber Of Agriculture, Fisheries, Livestock And Forests Of Cameroon (237) 287 Yaounde Cameroon M: 00 237 99 91 23 29 T: 00 237 22 05 24 27 F: 00 237 22 23 09 77 E: abigaelessomba@yahoo.fr</p>

3	The spices and herbs processing plant will begin with the extraction of oil from Ginger. Ginger oil is an essential oil widely used in the preparation of bottled, carbonated non-alcoholic beverage. It is also used in other food preparations and in pharmaceuticals. The country's demand for essential oils is met through import. Plant capacity and production programme. Plant Capacity: The annual production capacity of the proposed project is 32665 tonnes of ginger essential oil, Production Programme: At the initial stage of the production period, the plant requires some years to penetrate into the market. Therefore, in the first and second year of production, the capacity utilization rate will be 75% and 90%, respectively. In the third year and then after, full capacity production shall be attained. 1	<p>The contribution of the industrial sector is still low in the national wealth creation. According to the results of the 2003 industrial census, this sector accounted for 11% of the gross domestic product (gdp) in 2002 and only 6% was produced by manufactured companies. In this census, it appears that the industrial park has 243 industrial companies in process in which 79% is owned by nationals, 9% by foreigners and 12% by nationals in partnership with foreigners.</p> <p>Constraints identified are mainly related to factors of production, the quality of infrastructures, the non-availability of industrial land and the difficulties related to the supply of local raw materials.</p> <p>However, mali has significant assets that could propel its economy. One can refer to a policy of economic liberalization focused on private sector development and the availability of local raw materials (cotton, fruits and vegetables, rice, livestock ...). Given the globalization, the industrialization approach is the one that allows the penetration of foreign markets. The action plan on priority sectors (fruit and vegetables, cereals, oilseeds, livestock and meat, hides and skins, milk, cotton, fish, poultry) already in force is experiencing some problems related to the lack of financial resources and especially to the processing and the export capacity.</p>	Infrastructure	95	<p>Abou Diallo Deputy Director Investment Promotion Agency Of Mali (Api-Mali) Quartier Du Fleuve BP 1980 - Bamako Mali M: +223 72 65 72 79 T: +223 20 22 95 25/26 F: +223 20 22 95 27 E: abou.diallo@apimali.gov.ml/ adiallo@hotmail.com W: www.apimali.gov.ml</p>

Confederation of Indian Industry

The Confederation of Indian Industry (CII) works to create and sustain an environment conducive to the growth of industry in India, partnering industry and government alike through advisory and consultative processes.

CII is a non-government, not-for-profit, industry led and industry managed organisation, playing a proactive role in India's development process. Founded over 117 years ago, it is India's premier business association, with a direct membership of over 7100 organisations from the private as well as public sectors, including SMEs and MNCs, and an indirect membership of over 90,000 companies from around 250 national and regional sectoral associations.

CII catalyses change by working closely with government on policy issues, enhancing efficiency, competitiveness and expanding business opportunities for industry through a range of specialised services and global linkages. It also provides a platform for sectoral consensus building and networking. Major emphasis is laid on projecting a positive image of business, assisting industry to identify and execute corporate citizenship programmes. Partnerships with over 120 NGOs across the country carry forward our initiatives in integrated and inclusive development, which include health, education, livelihood, diversity management, skill development and water, to name a few.

The CII Theme for 2012-13, 'Reviving Economic Growth: Reforms and Governance,' accords top priority to restoring the growth trajectory of the nation, while building Global Competitiveness, Inclusivity and Sustainability. Towards this, CII advocacy will focus on structural reforms, both at the Centre and in the States, and effective governance, while taking efforts and initiatives in Affirmative Action, Skill Development, and International Engagement to the next level.

With 63 offices including 10 Centres of Excellence in India, and 7 overseas offices in Australia, China, France, Singapore, South Africa, UK, and USA, as well as institutional partnerships with 223 counterpart organisations in 90 countries, CII serves as a reference point for Indian industry and the international business community.
